

This is a reminder letter for the PSAT/NMSQT (Preliminary Scholastic Aptitude Test/National Merit Scholarship Qualifying Test) test which our students will take on October 24, 2018. The PSAT/NMSQT includes 2 hours and 45 minutes of actual testing time and 10 minutes of breaks. There will be tests in reading, writing and language, math (given in 2 portions – one with no calculator and one on which a calculator is permitted, although not required) and a variable section with questions from all three of those areas. No food or beverages are allowed in the testing area (including water bottles). We will provide small water bottles during our 5 minute breaks in a designated area.

The PSAT/NMSQT is part of College Board’s “SAT Suite of Assessments,” and is aligned with the SAT. At several points along its path, the SAT Suite of Assessments connects students to programs that recognize academic excellence and award college scholarships. Scores from the PSAT/NMSQT ARE NOT used in any scholarship or recognition programs. The purpose of the PSAT/NMSQT is to help identify strengths and weaknesses in terms of college and career readiness. This exam serves as a “check-in” on progress, allowing students, parents and teachers to pinpoint areas for focused practice as students progress through high school.

**Regarding calculator use and approved calculators**, the College Board states, “*All questions can be solved without a calculator, but a scientific or graphing calculator is recommended [for the portion of the math test on which a calculator is permitted] Students must bring their own calculators. Schools will not provide calculators on test day.*” Students may **NOT** use:

- laptops or other computers, tablets, cell phones, or smartphones;
- models that can access the Internet, have wireless, Bluetooth, cellular, audio/video, recording and playing, camera or any other smartphone-type feature;
- models that have typewriter-like keypad, pen-input, or stylus; or
- models that use electrical outlets, make noise, or have paper tape.”

**The following calculators ARE ALLOWED on the PSAT/NMSQT Math Portion that permits calculator use.** All scientific calculators are acceptable to use on the PSAT/NMSQT. Any four-function calculator can be used (though not recommended). The following is a list of approved graphing calculators for the PSAT/NMSQT. No other graphing calculator may be used.
